## Article Guidance

### Article Text:

This article contains coding and other guidelines that complement the Local Coverage Determination (LCD) for Routine Foot Care and Debridement of Nails.

### National Coverage Provisions:

The following services are considered to be components of routine foot care, regardless of the provider rendering the service:

- *The cutting or removal of corns and calluses;*
- Clipping, trimming, or debridement of nails, including debridement of mycotic nails;
- Shaving, paring, cutting or removal of keratoma, tyloma, and heloma;
- Non-definitive simple, palliative treatments like shaving or paring of plantar warts which do not require thermal or chemical cautery and curettage;
- *Other hygienic and preventive maintenance care, such as cleaning and soaking the feet, the use of skin creams to maintain skin tone of either ambulatory or bedfast patients, and any other service performed in the absence of localized illness, injury, or symptoms involving the foot.*

*The treatment of warts (including plantar warts) on the foot is covered to the same extent as services provided for the treatment of warts located elsewhere on the body.*

*Services ordinarily considered routine might also be covered if they are performed as a necessary and integral part of otherwise covered services, such as diagnosis and treatment of diabetic ulcers, wounds, and infections.*

Treatment of mycotic nails may be covered under the exceptions to the routine foot care exclusion. The class findings, outlined below, or the presence of qualifying systemic illnesses causing a peripheral neuropathy, must be present. Payment may be made for the debridement of a mycotic nail (whether by manual method or by electrical grinder) when definitive antifungal treatment options have been reviewed and discussed with the patient at the initial visit and the physician attending the mycotic condition documents that the following criteria are met: In the absence of a systemic condition, the following criteria must be met:

- In the case of ambulatory patients there exists:

*Clinical evidence of mycosis of the toenail, and*

*Marked limitation of ambulation, pain, or secondary infection resulting from the thickening and dystrophy of the infected toenail plate.*

- In the case of non-ambulatory patients there exists:

*Clinical evidence of mycosis of the toenail, and The patient suffers from pain or secondary infection resulting from the thickening and dystrophy of the infected toenail plate.*

### **Class A findings**

*Non-traumatic amputation of foot or integral skeletal portion thereof.*

### **Class B findings**

*Absent posterior tibial pulse;*

*Advanced trophic changes such as (three required):*

- *hair growth (decrease or absence);*
- *nail changes (thickening);*
- *pigmentary changes (discoloration);*
- *skin texture (thin, shiny);*
- *skin color (rubor or redness); AND*

*Absent dorsalis pedis pulse.*

### **Class C findings**

*Claudication;*

*Temperature changes (e.g., cold feet);*

*Edema;*

*Paresthesias (abnormal spontaneous sensations in the feet); and*

*Burning.*

*The presumption of coverage may be applied when the physician rendering the routine foot care has identified:*

1. *A Class A finding;*

2. *Two of the Class B findings; or*
3. *One Class B and two Class C findings.*

### **Loss of Protective Sensation (LOPS):**

For coverage information on Services Provided for the Diagnosis and Treatment of Diabetic Sensory Neuropathy with Loss of Protective Sensation (LOPS), and its relation to coverage of Routine Foot Care Services, refer to *Medicare National Coverage Determinations (NCD) Manual*, Section 70.2.1.

According to this National Coverage Determination,

*Effective for services furnished on or after July 1, 2002, Medicare covers, as a physician service, an evaluation (examination and treatment) of the feet no more often than every six months for individuals with a documented diagnosis of diabetic sensory neuropathy and LOPS, as long as the beneficiary has not seen a foot care specialist for some other reason in the interim. LOPS shall be diagnosed through sensory testing with the 5.07 monofilament using established guidelines, such as those developed by the National Institute of Diabetes and Digestive and Kidney Diseases guidelines. Five sites should be tested on the plantar surface of each foot, according to the National Institute of Diabetes and Digestive and Kidney Diseases guidelines. The areas must be tested randomly since the loss of protective sensation may be patchy in distribution, and the patient may get clues if the test is done rhythmically. Heavily callused areas should be avoided. As suggested by the American Podiatric Medicine Association, an absence of sensation at two or more sites out of 5 tested on either foot when tested with the 5.07 Semmes-Weinstein monofilament must be present and documented to diagnose peripheral neuropathy with loss of protective sensation.*

*The examination includes:*

*A patient history, and*

*A physical examination that must consist of at least the following elements:*

*Visual inspection of forefoot and hindfoot (including toe web spaces);*

*Evaluation of protective sensation;*

*Evaluation of foot structure and biomechanics;*

*Evaluation of vascular status and skin integrity;*

*Evaluation of the need for special footwear; and*

*Patient education.*

### **Coding Information:**

Procedure codes may be subject to National Correct Coding Initiative (NCCI) edits or OPPS packaging edits. Refer to

NCCI and OPPS requirements prior to billing Medicare.

For services requiring a referring/ordering physician, the name and NPI of the referring/ordering physician must be reported on the claim.

A claim submitted without a valid ICD-10-CM diagnosis code will be returned to the provider as an incomplete claim under Section 1833(e) of the Social Security Act.

The diagnosis code(s) must best describe the patient's condition for which the service was performed. For diagnostic tests report the result of the test if known; otherwise the symptoms prompting the performance of the test should be reported.

### **Specific Coding Guidelines:**

Global surgery rules will apply to routine foot care procedure codes 11055, 11056, 11057, 11719, 11720, 11721, and G0127. As a result, an E&M service billed on the same day as a routine foot care service is not eligible for reimbursement unless the E&M service is a significant separately identifiable service, indicated by the use of modifier 25, and documented by medical records.

### **Documentation Requirements:**

The patient's medical record must contain documentation that fully supports the medical necessity for services included within the LCD. (See "Indications and Limitations of Coverage.") This documentation includes, but is not limited to, relevant medical history, physical examination, and results of pertinent diagnostic tests or procedures.

Documentation supporting the medical necessity, such as physical and/or clinical findings consistent with the diagnosis and indicative of severe peripheral involvement must be maintained in the patient record.

Physical findings and services must be precise and specific (e.g., *left great toe, or right foot, 4<sup>th</sup> digit.*) Documentation of co-existing systemic illness should be maintained.

There must be adequate medical documentation to demonstrate the need for routine foot care services as outlined in this determination. This documentation may be office records, physician notes or diagnoses characterizing the patient's physical status as being of such severity to meet the criteria for exceptions to the Medicare routine foot care exclusion.

For debridement of mycotic nails, each service encounter, the medical record should contain a description of each nail which requires debridement. This should include, but is not limited to, the size (including thickness) and color of each affected nail. In addition, the local symptomatology caused by each affected nail resulting in the need for debridement must be documented. For CPT code 11720 documentation of at least one nail will be accepted. For CPT code 11721 complete documentation must be provided for at least 6 nails.

Routine identification of cultures of fungi in the toenail is medically indicated when necessary to differentiate fungal disease from psoriatic nail, or when definitive treatment for prolonged oral antifungal therapy has been planned. If cultures are performed and billed, documentation of cultures and the need for prolonged oral antifungal therapy must be in the patient record and available to Medicare upon request.

## Utilization Guidelines:

Routine foot care services are considered medically necessary once (1) in 60 days. More frequent services will be considered not medically necessary. Services for debridement of more than five nails in a single day may be subject to special review.

**Group 1 Medical Necessity ICD-10 Codes Asterisk Explanation:**

\* For these diagnoses, the patient must be under the active care of a doctor of medicine or osteopathy (MD or DO) or qualified non-physician practitioner for the treatment and/or evaluation of the complicating disease process during the six (6) month period prior to the rendition of the routine-type service.

**Group 2 Paragraph:**

Refer to Group 3 for the secondary ICD-10-CM codes required for coverage for codes 11719, 11720, 11721 and G0127.

**Group 2 Codes:**

ICD-10 CODE	DESCRIPTION

**Group 3 Paragraph:**

For treatment of mycotic nails, or onychogryphosis, or onychauxis (codes 11719, 11720, 11721 and G0127), in the absence of a systemic condition or where the patient has evidence of neuropathy, but no vascular impairment, for which class findings modifiers are not required, ICD-10 CM code B35.1, L60.2 or L60.3 respectively, must be reported as primary, with the diagnosis representing the patient's symptom reported as the secondary ICD-10-CM code. Refer to the "Indications and Limitations of Coverage and/or Medical Necessity" section of the related LCD.

Secondary Diagnoses to be reported with B35.1, L60.2 or L60.3 for treatment of mycotic nails, onychogryphosis, and onychauxis to indicate medical necessity:

**Bill Type Codes:**

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

**Revenue Codes:**

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.
